

DIRNDL COIN WHITEPAPER

1. INTRODUCTION

Dirndl Coin is a fun, community-driven crypto meme coin created to celebrate all women in Dirndl at the Munich Oktoberfest. Dirndl Coin will take you into a world full of beer, love across all borders, beautiful women in dirndls and the Bavarian lifestyle.

Are you ready for a wild ride, going up and down like a rollercoaster at the Munich Oktoberfest? The community sets the pace and how far we will come together. And that's exactly what Dirndl Coin is all about.

Dirndl Coin has no utility but a massive potential to reach the moon! As the Oktoberfest is a yearly event, Dirndl Coin

2. TOKENOMICS

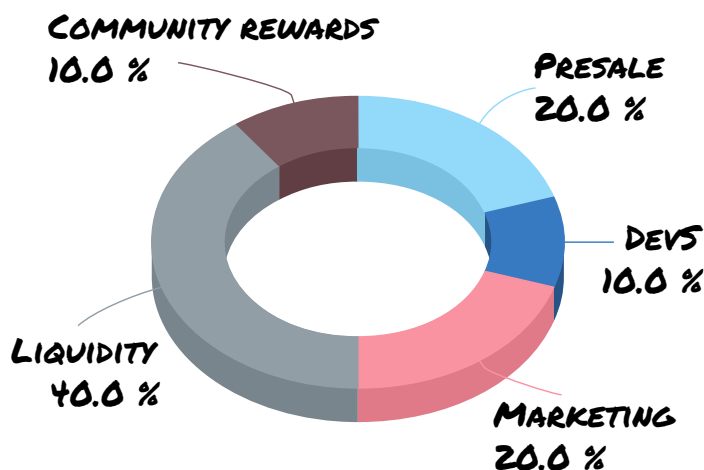

2.1 TOTAL SUPPLY

The total supply of Dirndl Coin is 10.000.000.000. This amount is chosen to maintain the fun and celebratory nature of the coin.

To increase the scarcity and value of Dirndl Coin, we will burn minimum 50% of the total supply at launch, creating a deflationary token. Additionally, the team will burn more tokens based on development of the coin and community feedback.

2.2 DISTRIBUTION

Dirndl Coin is distributed in a fair and inclusive manner, ensuring that everyone in the community has an opportunity to participate. Therefore only 20% of the total supply will be provided for the Presale. We want to avoid too much seller at the ICO which can dump the price.

2.2) PRESALE

We want to reward the early supporters and start with a much lower price compared to the ICO. If you buy in the first stage of Presale (100.000 Dirndl for 1 SOL), it will be worth +100% at the launch of Dirndl Coin (ICO). From stage to stage you will get less Dirndl Coin, respectively the price will increase.

Presale is limited to 20% as we want to push the ICO. Lots of meme coins have a much bigger Presale supply than liquidity for dex/cex which often leads to a big dump at the ICO.
